

Sewer and Water Minutes

March 6, 2018

Present: Don Schneyer, Tom Schuler, Tony Campetti, Mike Buffoni and Jennifer Carmichael. Absent: Peter Socha. Don asked for a motion to accept the minutes from February 6th Tom motioned to approve the minutes.

Hope to start Church Street project up when the blacktop plants open around April 1st. Palmer Paving will do the final trench paving. They will also pave the road when finished. There is about 600 feet of water main left to install, then all house connections etc. will be done.

Park Street pump station progress is in phase II requirements. Tony spoke with David Prickett the engineer, he suggested the Town buy most of the equipment needed rather than the contractor to save the Town money. His special article requires \$36,000. There are unfunded mandates on the horizon such as nitrogen levels.

The Town report was done by Tom with a big thank you.

A thank you also to Mike for the detailed information given to the Commissioners for the last special town meeting.

One of the pumps at the water plant needs to be looked at. The pump that goes into the clear well needs attention. The pump may need to be replaced and the cost should be around 5,000 to 6,000. Mike also mentioned the culvert on Route 183 has a huge hole in it that looks thru into the dirt.

Tom motioned to adjourn the meeting and all were in favor.

Next meeting: April 3, 2018

Respectfully submitted by,

Jennifer Carmichael
